Kyada Ayush Bharatbhai

Ahmedabad, Gujarat | 72018 98457 | ayushkyada2124@gmail.com

LinkedIn | GitHub | Portfolio

❖ PROFESSIONAL SUMMARY :

Innovative AI/ML Developer and MCA candidate specializing in **Agentic AI** and **Autonomous Systems**. Proven expertise in building end-to-end applications using **Python (Fast API)** and **Flutter**, with a focus on optimizing **LLMs** for resource-constrained environments. Microsoft certified in **Generative AI Ops** and **Machine Learning Ops**, with a track record of bridging natural language intent and system automation.

❖ EDUCATION :

- **Master of Computer Applications (MCA)**
  Silver Oak University **2024 - 2026**

- **Bachelor of Computer Applications (BCA)**
  Silver Oak University **2021 – 2024**

❖ WORK EXPERIENCE :

React Js. & MongoDB (Internship) :

N R Crew **06/2024 – 12/ 2024**

- Engineered high-performance, responsive dashboards using React.js to enhance user interface performance.
- Integrated analytics-based features to effectively visualize complex datasets.
- Optimized API calls and frontend-to-backend communication for better scalability.

PHP Developer (Internship) :

INFOTRONICX Pvt. Ltd. **03/2024 – 05/2024**

- Developed and maintained secure REST APIs for large-scale ERP systems.
- Optimized SQL queries to reduce server response times and improve efficiency.
- Implemented secure authentication protocols and core business logic for IoT and ERP modules.

CERTIFICATIONS :

- Operationalize Generative AI Applications (Generative AI Ops) | Microsoft | April 2026.
- Operationalize Machine Learning Models (MLOps) | Microsoft | April 2026.
- Introduction to Cybersecurity | Cisco Networking Academy | October 2025.

❖ TECHNICAL SKILLS :

- **Programming Languages &Frameworks :** Python , Dart (Flutter SDK) , JavaScript.
- **Artificial Intelligence & NLP:** LLMs ,AI Agent Architectures , LangChain , Intent Recognition, Task Decomposition, Prompt Engineering.
- **GenAI Ops & MLOps:** Operationalizing Generative AI, MLOps, Model Deployment, Azure AI Services.
- **Computer Vision:** OpenCV, Real-time Object Detection, Image Generation ,Face-based Biometric Authentication.
- **Data & Backend:** MongoDB, SQLite, REST API Development, SQL Query Optimization.
- **Tools & Security:** Git/GitHub, Cybersecurity Fundamentals.

❖ PERSONAL PROJECTS :

AI Autonomous Smart Response System :

- Developed a system for Windows OS Automation allowing users to control system tasks via Natural Language
- Integrated OpenCV Face Authentication to ensure secure execution and user identity verification

NeuroDesk - AI Intelligent Desktop Assistant :

- Built a cross-platform desktop automation tool using Python.
- Implemented Voice Interaction features to execute complex tasks through integrated voice commands

Object & Face Detection System:

- Achieved 92% accuracy in real-time vision tasks using TensorFlow and OpenCV
- Implemented facial analysis features to predict age and gender for user-specific data processing

TalentScout Chatbot:

- Utilized NLP and Data Science for intelligent information retrieval within recruitment workflows
- Designed intelligent response logic via deep query analysis.
